REACH-Declaration C.HAFNER GmbH + Co. KG

Dear Sir or Madam,

According to the REACH regulation (EC) 1907/2006, we are downstream users (DU) as well as manufacturers.

Our products are either pure substances, mixtures or articles. When we manufacture our products, we use precious metals (substances) that we produce ourselves. On the other hand, we also use substances and mixtures that are supplied to us when manufacturing our products. In this case we are a downstream user in the sense of the REACH Regulation.

We have registered the following precious metals (substances) with the ECHA (European Chemicals Agency) in a timely manner:

Substance	CAS-No.	Registration Number
Gold	7440-57-5	01-2120113095-69-0000
Silver	7440-22-4	01-2119555669-21-0024
Palladium	7440-05-3	01-2120140175-66-0010
Platinum	7440-06-4	01-2120733612-61-0020

The substances and mixtures that we purchase from our suppliers are also registered where required. According to information provided by our suppliers, the materials they deliver do not contain any substances from the currently valid SVHC candidate list set out by the ECHA or, if they do, then the maximum permissible limit values are observed.

Our products also do not contain any substances from the current SVHC candidate list ([SVHC-candidate list](#)) or, if they do, then the maximum valid limit values are observed.

We will inform you as soon as we find out that we are obliged to notify you about our products according to Article 33 of the REACH Regulation EC 1907/2006.

Further information about our registered substances and other issues regarding REACH are available online at the European Precious Metals Federation (EPMF) under epmf.be or you can contact us to find out more

Yours sincerely,

C.HAFNER GmbH + Co. KG

i. V. Dr. Michael Huber
